

mobile stockpilers MPT 18g

Belt conveyors MPT 18g and MPT 24g from the Heavy Duty series are machines for customers looking for solutions with above-average durability and high efficiency. Thanks to the well-thought-out design and the use of a 2.8 CAT engine (55 kW at 2500 rpm), it is possible to move up to 600 tons of material per hour. The radio control of the machine is already available as standard, and it can be optionally equipped with direct hopper that allows to work with the front loader. The undoubted advantage of Pronar conveyors is their easy transport. The possibility of transporting it in a 40 'HQ sea container significantly improves the machine reaching the other end of the world.

KEY FEATURES & BENEFITS

- | durable construction
- | possibility of loading with a front loader
- | a direct feeding hopper with a volume of up to 12 m³
- | efficient drive
- | easy transport
- | wireless remote control as standard

TECHNICAL DATA

MPT 18g

Conveyor length (total construction length) [m]	19,3
Throughput max [t/h]	500
Discharge height [m]	8,7
Tilt angle max	25,2
Belt width [mm]	1000
Weight [kg]	13800
Dimensions (length/width/height) [mm]	11860/2250/2557
Engine	CAT 2.8l, 55,4 kW (75 HP), Stage V/Tier 4 Final
